DETAILED ACTION

Claims 1-15 are currently pending in the instant application.

I. *Priority*

The instant application is a 371 of PCT/IN02/00225, filed on November 20, 2002.

II. *Information Disclosure Statement*

The information disclosure statement (IDS) submitted on May 18, 2005 is in partial compliance with the provisions of 37 CFR 1.97 because of a missing copy of the non patent literature document. Accordingly, the information disclosure statement has been partially considered by the examiner.

III. *Rejections*

Claim Rejections - 35 USC § 112, 2nd paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, step (vii) contains the phrase "the resulting organic layer washed aqueous layer". The phrase is unclear to what is being referred to, "the organic layer" or "the aqueous layer". Appropriate correction is required.

IV. Objections

Claims 1-4, 7-11, 14 and 15 are objected to because of the following informalities: claims 2, 7, 10, and 13-15 do not end with a period. Claim 11 ends with a comma instead of a period. Each claim begins with a capital letter and ends with a period (MPEP 608.01 (m)). In claim 1, step (i), there are two commas after the term "weight". In step (ii) of claim 1, the phrase "1-4 hours" should read "1 to 4 hours". In step (iii) of claim 1 the term "degree" should be in plural form. In step (viii) of claim 1, there are two beginning parenthesis before the term "step vi". In step (ix), the temperature is missing the "degrees C" and the range should read "30 to 35 degrees C". In step (x) of claim 1, the temperature range should read "60 to 110 degrees C" instead of "60-110 deg C". In claims 2, 3 and 9, the term "the" before "step", should not be present for grammatical reasons. In claim 4, the term "in" is duplicated. In claims 6 and 8-11, the term "effected" is not properly used and should be amended for grammatical reasons. In claim 6, the term "form" should read "from". In claim 8, the temperature range should read "-5 to 0 degrees C" and not "-5 to -0 degree C". In claim 13, the ranges should read "80 to 100 degrees C", "3 to 8 hours" and "5 to 8 hours" and a comma should be present after "5 to 8 hours". In claim 15, the ranges should read "60 to 90 degrees C" and "60 to 65 degrees C". Appropriate correction is required.

Specification

Applicant is reminded of the proper content of an Abstract of the Disclosure.

In chemical patent abstracts for compounds or compositions, the general nature of the compound or composition should be given as well as its use, e.g., "The compounds are of the class of alkyl benzene sulfonyl ureas, useful as oral anti-diabetics." Exemplification of a species could be illustrative of members of the class. For processes, the type reaction, reagents and process conditions should be stated, generally illustrated by a single example unless variations are necessary.

Complete revision of the content of the abstract is required on a separate sheet.
